Come Down this Way.

Rock Hill claims to have fiftyfour young bachelors who are engaged in business and able to make a good living. In Camden we have but few unmarried men, but we have quite a number of as handsome and accomplished young ladies as can young fellows should desire a partner for life they will win a prize if they can capture one of these young ladies. However, we don't want to see the girls leave Camden. We want tho fellows to settle here, and become citizens of our town.

Another Enterprise.

We understand that on Tuesday last the old factory site near Camden, owned by Mr. W F. Morrell, was purchased by a northern gentleman who intends to erect a cotton factory there. We are pleased to see this start; and now, since the "ice is broken," we hope that our resources will be rapidly developed, for in the vicinity of Camden there is located several of the best waterpowers in the State, and it requires very little capital, comparatively to bring them under perfect control.

New Mail Route.

A petition signed by over 100 citizens of the section between Haile's Gold Mine and Camden has been forwarded to the Postmaster General to establish two new post offices in this county. One at J. M. Kirkley's store, to be known as Shiloh, and one at Mr. Wm. Dabney's on the Lock hard road, twelve miles above Camden, to be known as Gum Swamp Post office. We sincerely trust that the having to send from eight to twelve miles to reach the nearest post

A Highhanded Outrage.

Capt. J. McClair, a resident of West Wateree is one of the most peace able and well to-do citizens of that section, and he is strongly in favor of the stock law. Some of his neigh bors are opposed to it, and threaten vengeance upon any one who obeys its mandates. The Captain is not a man to be bulldozed by any threats and had accordingly prepared to plant his fields without fencing them. Upon learning this, some infamous scamp last week set fire to his turpentine still, which however, was discovered in time to prevent the entire destruction of the propertyonly \$75 or \$100 damage being done. On the next morning he found a letter addressed to him in which his life was threatened if he persisted in planting unfenced fields. He has letermined to plant his fields, and is also making great efforts to discover the perpetrators of the outrages refered to above. It is hoped that he will be successful.

The Population of Camden.

In the News and Courier of the 17th inst., we notice a list of the cities and towns in this State and the number of inhabitants accredited to each. Camden stands fourteenth on that list, whereas it ought to, by "A Card." right, stand fifth. Kirkwood is as much a part of Camden (and was a part of the town until 1878) as any other part of the town, as no one would know, unless the line were pointed out, where the boundary was. The streets and squares are the same as in town. Including Kirkwood, Camden would have a population of at least 3000 instead of 1750, - the number now given to it. The report places us in rather a bad light, and makes it appear that Camden is a very insignificant place. The corporate limits of the town are just the same now that they were 125 years ago, when the population was not more than 300 or 400. The suburbs are now as thickly settled ton. as the town itself, enjoying the same rights and benefits that the citizens of the town do and should be in-
